C.O.T.A. Activity in Honor of St. Mary
Dear friends and colleagues OM and SWL:
For the 61th anniversary of the proclamation of the Virgin Mary "Virgo Fidelis" as a patron saint of the Carabinieri, as well as to raise awareness and celebrate the first "mother" of every policeman, I?m pleasure to inform you that ...
from 15th November 00.00 UTC to 24.00 UTC on 21th November 2010 the C.O.T.A. (Amateur Radio Association "Carabinieri On The Air") will activate the radio station IQ6CC
1. The special call will operate on all HF bands and modes.
2. The QSL Manager is Lorenzo Iannone (IZ4SUC).
3. The QSL cards for the contact can be sent via bureau or direct (with SASE).
This is the Operators list: IZ6IQA Claudio, IK6BAK Eliseo, IZ6OYU Fabrizio, IZ6FYI Giuseppe, IK6HLN Gianni, IZ6FUQ Stefano, I6TND Vito, IK6ZJE Domenico, I6YOT Mimma and IW6MKI Ubaldo.
On 8 December 1949, His Holiness Pope Pius XII, in accepting the request of the Military SE Bishop Carlo Alberto Ferrero Cavallerleone, officially proclaiming Mary "Virgo Fidelis Patron Saint of Carabinieri Force", by the celebration of 21 November, to coincide with the presentation of the Virgin Mary in the Temple and the anniversary of the Battle of Culqualber.
You are all invited to attend and we will be delighted to contact all those who wish to demonstrate their sympathy to the Italian Military Police "Carabinieri".
I also hope that you find time to follow this activation as well as all

activities on the COTA website www.cota.cc/...where there are all and more useful info for activation. "73". See you soon"ON AIR" [IZ0RNU]

COUNTY HUNTING (USA-CA) -

KD8HB - Joyce - 7* - NOV. 5 to NOV. 5 - CW Only
Bands: 20,30,40,80 CW only.
OHIO: Champaign, Madison, Fayette, Pickaway, Ross, Pike, Scioto (maybe), Adams, Brown, Highland, Clinton, Greene, Clark and Champaign. QSL via home call. [County Hunter Web]

W4SIG - Kerry - 11/9/10 to 11/10/10 - SSB and CW
An ambitious trip for some much needed Kentucky counties. Now good for BINGO! Will start about 1200z each day and run very late in the evening. Will run 40cw/40ssb/30cw/20cw/20ssb. All bands are available and might be able to run on special requests and if time permits. Unfortunately due to S7 engine noise (thanks Ford) and being by myself I must usually stop and run county lines so I can copy well. This combined with running multiple bands/modes will slow me down. Plan is to start early on Tuesday and get home in the wee hours Thursday. Please keep an ear out as there is a possibility that I may need to push this trip out a day or two. PLEASE post me. As usual the route is subject to change for unknown circumstances.
KENTUCKY: Allen, Monroe, Metcalfe, Cumberland, Clinton, Wayne, Pulaski, Casey, Russell, Adair, Taylor, Green, Marion, Washington, Boyle, Lincoln, Garrard, Jessamine, Madison, Clark, Estill, Powell, Menifee, Wolfe, Morgan, Magoffin, Floyd, Knott, Martin, Johnson, Lawrence, Elliott, Carter, Lewis, Rowan, Fleming, Robertson, Nicholas, Harrison, Scott, Woodford, Anderson, Washington, Nelson, Spencer, Hardin, Meade, Hart, Edmonson, Warren and Simpson. QSL via home call. [County Hunter Web]

QSL INFORMATION -

I am pleased to announce the launch of my On-line QSL Request System (OQRS). In addition to the long established ability to request bureau cards via e-mail, you can now request QSL cards for any of the 100+ callsigns that I manage to be mailed to you direct and to pay for the postage etc. via

PayPal. Why bother with mailing direct? The OQRS is easy and reasonable. Any queries or unforeseen issues will be handled via e-mail. Please visit my web site www.g3swh.org.uk for further information and instructions.

VP8ORK Press Release #3 - The Low-Band Plan

Many have been asking about our low-band plans for the upcoming VP8ORK South Orkney DXpedition in January 2011. With antennas to cover 75, 80 and 160m simultaneously from sunset to sunrise, dedicated receive systems and top-of-the-line radios, we will be active on all these bands, every night, for almost two solid weeks. Rest assured that we're giving the low-bands a top priority.

Of course this doesn't mean we're ignoring 40m and up. It just means we're putting in a bigger effort than usual on those bands where the need is greatest.

We realize that lone operators at remote polar science stations often have limited time and equipment to make an effort on every band, let alone 80 or 160. This is why the big Antarctic DXpeditions are there to fill in the gaps. These expeditions offer experienced DXers a chance at working some new band-modes, and newcomers a chance at climbing the honor-roll.

Here is a listing of our low-band arsenal:

Antennas:
160 transmit
The Battle Creek Special (160 main)
85 foot vertical wire supported by Spiderbeam telescoping pole (160 backup)

80 transmit
SteppIR vertical with 80 meter coil (CW) (80m)
60 foot vertical wire supported by Spiderbeam telescoping pole (75m)

60 foot vertical wire supported by second Spiderbeam telescoping pole (backup)

160/80 receive
DX Engineering 4 square with DX Engineering preamp and DX Engineering splitters to feed 3 low band radios.
Two RX beverages as an option to 4 square dependant on circumstances encountered on site.

Radios:
7 x K3 transceivers (sponsored by Elecraft)
3 x Acom 1010 amplifiers (sponsored by Acom)
2 x Acom 1000 amplifiers (sponsored by Acom)

Team:
EY8MM, K9ZO, ND2T, 9V1YC, K0IR, N1DG, W3WL, K6AW, N6MZ, N4GRN, WB9Z, W7EW, and VE3EJ

I'm sure most of you recognize these calls. This team brings with it an unprecedented amount of experience in Antarctic DXpeditioning, contesting and low-band knowledge to ensure that all bands are covered from start to finish.

But, even with a great plan, the best equipment and experienced operators, activating the remote entities of the Southern Ocean is still one of the most challenging aspects of amateur radio. These islands are some of the windiest, coldest and roughest places on earth to survive, and just reaching them is an achievement in itself. Its no secret that private, non-governmental Antarctic expeditions come at an astronomical cost, and without support from everyone within the DX community these trips would simply not happen.

We're extremely grateful to have major DX foundations such as the NCDXF, INDEXA and the ARRL funding us with large donations. We're also thankful to have support from many worldwide DX clubs and commercial equipment sponsors such as Elecraft, Acom, DX Engineering and SteppIR. But even with all that, and each team member contributing over $12,000, it still doesn't even come close to covering the massive expense of a polar expedition. We need financial support from all of you.

If you haven't sent in a donation yet we hope you will consider joining those who have already stepped up to help. Our website www.vp8o.com [1] gives full details of our trip, and is where you can contribute at whatever level you feel comfortable.

We look forward to working you on all bands!

Space Weather News for Nov. 3, 2010
FARSIDE SOLAR FLARES: An active region just over the sun's eastern horizon is crackling with solar flares and hurling material high above the stellar surface. One of today's flares, a C4-class event, created a wave of ionization in Earth's upper atmosphere despite the fact that the blast site was not directly visible from Earth. The source of this activity appears to be old sunspot 1112, which has spent the last ~12 days transiting the far

side of the sun, and is now about to turn back toward our planet.
